## **Vixen**

By Bud Sparhawk

*Cosmos*, \$6.99, 304 pages

*Vixen* has many of the elements that could make a very good story. Colonists awakening in a new star system, and many years and distance from help. Strange happenings that bring in the possibility of aliens. Reality of aliens, and the multiple reactions to them from the human crew. However, *Vixen* just isn't very well written. The dialog is stilted, the situations forced, the characters stereotyped and cardboard cutouts. This is the sort of science fiction that people who don't read any, think that all SF is like.
